

Western, UK Bingo

In this bingo set you'll find:

Page 1: This explanation sheet.

Page 2: Worksheet for the teacher with all numbers for announcing.

Print these 2 cards on thick paper. Cut out the numbers, put them in an opaque bag and use them for announcing.

Page 3. Teacher's document to indicate which numbers have been announced.

When a number has been announced, you cross this number on this document with your pencil.

Use this document for checking the players' cards after they call 'bingo'.

When the game is finished you can throw away this card.

If you play more games, prepare more page 3 documents.

Also prepare more students' cards when you want to play more games because they can use a card for one game only. (This because they write on it)

4. Many different kinds of bingo cards for players. You'll find these cards on the **separate pdf file** after you close this one.

When a number has been announced, the student can cross it on his/her card using a pencil.

How to play:

Give each player 1 card.

Teachers/assistants determine when there is a bingo: after one full row (3 numbers), 2 full rows, or a full card.

When a number is announced, the students cross that number with their pencil.

When they have all numbers of 1, 2, or a full card they call '**bingo!**' loudly.

The teacher/assistant checks this card with document 3.

Before starting, prepare some small prizes for the winners.

Enjoy your UK/Western Bingo.

2.

Bingo Caller Card for Announcing

Bingo caller card for announcing. When you announce a number, circle it on this document. Use this document to check after a player calls 'bingo'.
